Tijuana, B.C.  
Mexico

July 28, 2009

To Whom It May Concern,

International Rectifier Corporation (IRC) is a pioneer and world leader in advanced power management technology, from digital, analog and mixed-signal ICs to advanced circuit devices, power systems and components.

We believe very strongly in supporting the vendors that provide us with superior quality equipment.

In 2005, we acquired two continuous belt furnaces from Torrey Hills Technologies for our manufacturing facility in Tijuana, Mexico.

We have been using these two furnaces in high volume production ever since.

Their up time and performance has met and exceeded all of our expectations!

Mr. Ken Kuang at Torrey Hills Technologies and Mr Ken Reynolds, Lorac Furnace Experts, have truly done an excellent job and we are very satisfied customers!

Thank you!

Sincerely,

Francisco Gutierrez  
Purchasing Manager
